Experience

Software Engineer *Tokyo, Japan*
DataVisor *Feb 2025 to present*

- Develop features for and maintain the feature platform and rule engine behind a real-time fraud detection product — Java/Spring over Kafka, Flink, ClickHouse and Redis — running under a 10 ms p99 decisioning budget on several TB of transaction data per day
- Carry production on-call — alert triage, traffic failover, Kubernetes cluster and pod debugging; diagnose live JVM services under load with Arthas, jcmd, async-profiler and thread/heap dump analysis
- Built a fully local deployment and test environment by removing remote AWS S3 and Flink dependencies, letting engineers reproduce and debug the entire stack on one machine with Docker and local services

Projects

Bugfox *GitHub*

- Automated trace-based root-cause analyzer for software regressions — no manual bisection, resolves each case in under 1 minute, 83% localization accuracy on 12 real-world regressions from the BugsJS benchmark
- Tools Used: JavaScript, Node.js, Shell

Sand *GitHub*

- Programming language implemented from scratch in C++ — hand-written LL(1) parser, interpreter and runtime, supporting explicit function inlining, function redefinition and labeled loops
- Tools Used: C++, Make/CMake

Technologies

Languages: Java, C++, C, Python, SQL, JavaScript

Backend & Infrastructure: Spring, Linux, Shell Scripting, Docker, Kubernetes, AWS S3, Make/CMake, Git

Data & Streaming: Kafka, Flink, Redis, ClickHouse, Doris, Yugabyte, MySQL

Observability & Debugging: Grafana, Arthas, jcmd, async-profiler, thread/heap dump analysis

Publications

Yet Another Trace-Based Approach for the Cause of Software Regressions in JavaScript and Python Jul 2025

Feng Dai, ***Yuefeng Hu***, Tetsuro Yamazaki, Shigeru Chiba

Bugfox: A Trace-Based Analyzer for Localizing the Cause of Software Regression in JavaScript Oct 2024

Yuefeng Hu, Hiromu Ishibe, Feng Dai, Tetsuro Yamazaki, Shigeru Chiba

10.1145/3687997.3695648 (SLE '24)

Education

The University of Tokyo *Oct 2022 to Sep 2024*
MS in Computer Science

- GPA: 4.0/4.0
- First-author paper at SLE '24; all source code and artifacts open sourced

Beijing University of Posts and Telecommunications *Sep 2017 to Jul 2021*
BS in Software Engineering
